

# MMT BIOTECHNOLOGY EXTRA STRENGTH

The New Standard in Topical Medication

From *American HealthCare-USA*

AMERICAN HEALTHCARE

## MMT BIOTECHNOLOGY FOR TOPICAL DRUGS

Starting in the year 2000 Biotechnology for topical drugs became a reality. It became possible for one well designed product to treat a wide variety of topical problems. MMT is the reality of 20 years of that research. Advanced research on new ingredients and products continues. At the present time we have research and products that are unmatched by any other company.

The ingredients used in MMT's topical drugs are extracted from plants. Oats, Tea, Apples, and Spearmint are common. The molecules have high purity and are often shaped to provide special functionality. These ingredients have G.R.A.S. Status (Generally Regarded As Safe) allowing for the formulation of very mild products that provide a defense from cell damage, irritation and inflammation, plus, faster healing of wounds and burns, control of microorganisms, and more.

With the advent of new biotechnology molecules, advanced topical product formulations arrived. The old active, inactive ingredient concept is obsolete and is replaced with an Active System, where all the ingredients in the product are medically active and contribute to the efficacy. This approach allows for the treatment of multiple conditions at once and opens vast new medical opportunities never before possible. The efficacy of these new active formulations is superior. As the technology advances, more companies will adopt these principles and eventually this approach should become the standard of care.

## SKIN CANCER PREVENTION

It doesn't kill cancer cells, but instead acts to prevent the formation of new cancers. As a result, the treatment can take up to 7 to 9 months to show effectiveness because all the old cancer cells have to grow out and be treated. This product has shown an 80% effectiveness in treating skin cancer.

## ACNE CREAM

MMT Acne is a cream used by adolescents and adults to treat skin conditions on the face, neck and back regions caused by Acne vulgaris. MMT Acne cream contains ingredients specially formulated to treat Acne vulgaris. Salicylic acid is able to readily interact with lipids responsible for inducing efficient corneocyte exfoliation in and around pores, preventing clogging of pores and allowing for new cell growth. Oat Kernel Extract has anti-inflammatory properties to reduce or eliminate itching and irritation. It contains a combination of mild ingredients which provide a rapid kill rate for Staphylococcus bacteria.

## DRY SKIN ECZEMA

MMT Biotechnology is suitable for all dry skin conditions. Powerful anti-inflammatories and antioxidants reduce itching, recurring rashes, and other persistent skin conditions. A decrease in surface roughness and irritation is typical in the first few days. It provides comfort and itch relief in several ways: Salicylic acid has the ability to exfoliate skin cells that can cause itching. Oat Beta Glucan provides moisture to soften skin and help reduce irritation and itching. In addition, antioxidants provide antimicrobial activity. Note: Eczema is often caused by continuous contact with an irritant. MMT Biotechnology won't help the condition till the irritant is removed.

## ALLERGIC REACTIONS - INFLAMMATION and RASHES

This is a broad topic and covers many conditions, including food, chemicals and environmental skin reactions. As a rule of thumb discomfort is generally gone quickly and the condition is typically eliminated within a week. More study is required in this area.

## WOUND CREAM

Cracked hands and feet heal in a month. Faster healing occurs with minor cuts, scratches, scrapes, abrasion and chaffing two small studies indicate that diabetics, who typically have poor wound recovery, heal just as fast as normal patients.

## INSECT BITE CREAM

Mosquitos. Fire Ants. Flies and Spiders The discomfort is gone in 20 minutes or less. 5 to 15 Minutes is typical. For most people one application eliminates reactions in patients allergic to bites. We have been furnishing this in glass bottles for long term stability for people to keep on hand to prevent reactions. We don't yet have enough data to know about Bee and Wasp stings. Note: not tested yet on chigger bites. Basically. The formula encapsulates the bite and holds it in place till it is gone. Powerful anti inflammatories reduce and eliminate the irritation.

## BURN CREAM

Treats 1st 2nd and 3rd degree burns. The discomfort is typically gone in 30 minutes or less. There is either no feeling of a burn remaining or just a very slight feeling. Again, small studies show major 3rd degree burns react the same and are gone typically in a week. MMT Burn Cream not only treats the discomfort it speeds healing and restores the skin in the area of the burn.

9.6.2019

9.6.2019

16.6.2019

## BOIL CREAM

For most patients boils are reduced and eliminated. Daily applications to areas subject to boils can prevent or reduce recurrence.

## COLD SORES CREAM

Cold sores are caused by a virus. MMT Biotechnology has anti-microbial properties that have proven effective for this condition. In the US, no prescription product will eliminate the irritation faster or heal faster.

## SCAR CREAM

Accidents and surgeries can produce scars that last a lifetime unless treated. MMT Scar cream is a double acting formula. First; the scar tissue is flattened making it less noticeable. Second; the tissue around the scar is strengthened. These results are permanent and do not need continuous treatment. In some cases scars disappear entirely.

## BLEMISH CREAM

Athletes foot is an itching, irritating condition that typically exists between the toes. Working in hot and often humid conditions promotes this. Typical preparations sold in stores don't relieve the itching or irritation. Treating with Athletes Foot Cream relieves both itching and irritation, and heals the skin.

## GYNA CREAM

Candida Albicans cause nasty infections in women and create an undesirable odor. This condition is typically difficult to eliminate. The new MMT Biotechnology formula has undergone extensive human testing in environments all around the world. The result is a double acting formula that quickly kills yeast infections and eliminates unpleasant odors.

## DIAPER RASH CREAM

Babies often remain in wet bacteria infested diapers for long periods of time. This can cause a mild to severe case of diaper rash. MMT Biotechnology is new and is designed to be applied only twice per day, morning and night and not with each diaper change. It keeps baby very dry while relieving irritation, eliminating bacteria and healing the skin.

## DIABETIC FOOT / CRACKED FOOT CREAM

People who live and work in hot dry climates along with others who are on their feet many hours a day and often in damp or wet conditions develop irritation and cracks in the skin on their feet. This painful condition that can last for months. MMT Cracked foot cream is specifically designed to treat cracked foot conditions. Typically, irritation is gone in less than a week. Cracked skin heals after about a month of treatment.

## ATHLETES FOOT CREAM

Athletes foot is an itching, irritating condition that typically exists between the toes. Working in hot and often humid conditions promotes this. Typical preparations sold in stores don't relieve the itching or irritation. Treating with Athletes Foot Cream relieves both itching and irritation, and heals the skin.

## STRETCH MARK CREAM

Skin that is stretched to far causes tears in the collagen fibers in the dermis. These fibers do not grow together again and stretch mark scars remain. This is a common condition for many pregnant women. Unless treated, these stretch marks remain for a lifetime. MMT Stretch Mark Cream is a double acting formula. First; the scar tissue is flattened making it less noticeable. Second; the tissue around the stretch mark is strengthened and the wrinkled area greatly reduced and smoothed. These results are permanent and do not need continuous treatment. In some cases stretch marks disappear entirely.

## BED SORES CREAM

Bed sores occur when bed patients are allowed to remain in the same position for long periods of time. Bones push down on the skin causing sores. To prevent these sores or to help heal them the patient must be turned often. MMT Bed sore Cream quickly eliminates the irritation and treatment heals the sore.

## SUNSCREEN CREAM

MMT Biotechnology is an excellent high protection daily sunscreen. People are wearing it all day in the sun. It functions differently. Typical sunscreens use UV filters to reduce the UV radiation reaching the skin. MMT Biotechnology allows the rays to penetrate, but renders them harmless preventing them from damaging cells. There is no red skin. Since it works from the surface and all the way down through the dermis, the deep penetrating part of the UV spectrum poses no danger. More people are starting to use it as their normal sunscreen outdoors.

## SUNBURN CREAM

The discomfort is gone in less than 30 minutes, including severe sunburns. You can't tell there is a sunburn unless you look in a mirror. Unlike other sunburns, the redness persists for a week. There is minor peeling only with severe burns.

## BIOCELL CREAM

For individuals as well as families, always keep a tube of MMT BioCell Cream on hand to treat the occasional problems that always come up. BioCell Cream is designed to treat all the skin conditions on this list. It is your pharmacy in a tube. Keep it at home, in the office or with you when you travel.

## LIGHTENING CREAM

MMT Biotechnology is a new concept in skin whitening. Typical whitening preparations are bleaches that that lighten overall skin tone. The discoloration is still present only lighter. MMT Biotechnology targets overproducing melanocytes and levels out melanin production to produce a very uniform skin color. Age spots, discoloration from sun damage and heredity are eliminated. Over time a lighter skin tone can be achieved. The uniform skin tones produced is a very satisfactory treatment for many

## WRINKLES REDUCTION & MOISTURIZATION

Typical moisturizers that only prevent evaporation simply are not effective. Also people typically need added moisture from the surface through to the dermis. Oat Beta Glucan is a polyscharride that binds to water and acts as a mode of transport for carrying highly important nutrients for restoration deep inside the skin where it surrounds the cells. It provides powerful moisturization and anti wrinkle properties. Combined with antioxidants, it acts as a powerful product for wrinkle reduction, And provides moisture from the surface all the way through the dermis.
