Ostiron Aqua Blue Filler®
Hyaluronic acid gel filler 20mg per 1ml
For Fine Wrinkles (Fine Line)

Aqua Blue filler Page 1 of 2

Description

Aqua Blue Filler® is a 20mg per 1ml. It is a biodegradable stabilized hyaluronic acid (sodium salt) which is a colorless, transparent, viscous, sterile and nonpyrogenic injection, and is supplied in a glass syringe with 7 Ph for single use only. This products contain **NO ANIMAL INGREDIENTS AND HAS NOT BEEN TESTED ON ANIMALS**. Aqua Blue Filler® is a cross link dosage of fermented and stabilized hyaluronic acid which is a kind of natural polysaccharides occurring as an important structural element in the skin, subcutaneous and connective tissues as well as in the synovial fluid. Hyaluronic acid is highly biocompatible and identical in all living organisms.

Recommended Indications

Aqua Blue Filler® is recommended to correct fine lines and superficial wrinkles: sensitive areas, superficial lines, such as worry lines, periobital lines, and perioral lines. Aqua Blue Fine Lines ®, a top-up treatment requiring a smaller injection, is recommended after 6 months.

Where to Inject

Aqua Blue Filler® is best used for superficial wrinkles and crow's feet wrinkles. Aqua Blue Filler ® can be used to rejuvenate. Best to use a 30G needle.

Ostiron Filler

Ostiron Filler

Ostiron Aqua Blue Filler®
Hyaluronic acid gel filler 20mg per 1ml
For Fine Wrinkles (Fine Line)

Aqua Blue filler Page 2 of 2

Shelf Life

Aqua Blue Filler® shelf life is two (2) years from the manufacturing date, as indicated on the package.

Storage Conditions: Store up to 20C. Protect from freezing and sunlight.

Caution: Aqua Blue Filler® is a medical product, sterile, and for single use only. This product is to be sold only to specialty licensed trained health management person.

Product Package & Order No: Aqua Blue Filler®. This Product lasts from 6 to 9 months. Packaged in 1ml with 2/30G. For re-order use this product **No# 39601**

* This average life span depends on several factors: patient's skin type, severity of the wrinkle to be corrected, type of injection (superficial, medium or deep dermis) and the volume injected

Ostiron Filler

Golden Filler®
Hyaluronic acid gel filler 20mg per 1ml
Medium Derm Line

Aqua Blue filler Page 1 of 2

Description

Golden Filler® is a 20mg per 1ml. It is a biodegradable stabilized hyaluronic acid (sodium salt) which is a colorless, transparent, viscous, sterile and nonpyrogenic injection. It is supplied in a glass syringe with 7 Ph for single use only. This products contain NO ANIMAL INGREDIENTS AND HAS NOT BEEN TESTED ON ANIMALS. Golden Filler® is a cross link dosage of fermented and stabilized hyaluronic acid which is a kind of natural polysaccharides occurring as an important structural element in the skin, subcutaneous and connective tissues as well as in the synovial fluid. Hyaluronic acid is highly biocompatible and identical in all living organisms.

Recommended Indications

Golden Filler® is the latest generation filling implant in the technoderm range and the ideal solution for sagging skin and the loss of fatty facial support. Specially designed for remodeling faces requiring large volumes of product, Golden Filler® enables significant improvement of facial harmony by increasing subcutaneous tissue. It creates volume ensuring the immediate correction of medium skin depressions.

Where to Inject

In a controlled multicenter study, Golden Filler® is best used for at the medium dermis line for wrinkles such as glabellar, oral commissures, lip fullness, pouting and vermilion border. (See figure)

Ostiron Filler

Beauty Lips®

Hyaluronic acid gel filler 18mg per 1ml

Rejuvenates Lips (Deep Derm Layer)

Aqua Blue filler Page 1 of 2

Description

Beauty Lips® is a 18mg per 1ml. It is a biodegradable stabilized hyaluronic acid (sodium salt) which is a colorless, transparent, viscous, sterile and nonpyrogenic injection, and is supplied in a glass syringe with 7 Ph for single use only. This products contain NO ANIMAL INGREDIENTS AND HAS NOT BEEN TESTED ON ANIMALS. **Beauty Lips®** is a cross link dosage of fermented and stabilized hyaluronic acid which is a kind of natural polysaccharides occurring as an important structural element in the skin, subcutaneous and connective tissues as well as in the synovial fluid. Hyaluronic acid is highly biocompatible and identical in all living organisms.

Recommended Indications

Lips can be difficult to treat because of their mobility and dense blood vessel network, so they require a specially developed product. Beauty Lips® is an exclusive, innovative gel formula to treat the sensitive area around the lips. **Beauty Lips®** is highly cross-linked in order to obtain a product which is more resistant to being broken down, guaranteeing optimal lifespan. A top-up treatment, requiring a smaller injection, is recommended after 6 - 9 months.
